

**Viewsys 4K** A Next gen product of Thelocads allows customers to add value with an advent of HD content( Image , Video) over screen and give definite dimension to their business.

A simple solution that works on **Pay as grow** module and allows client to use HD content over signage solution at finger tips

Business entity can use it to raise brand value through video to explain their product line in a much amicable

way. Thelocads DS solution is easy to use and allows user to use the product without having much knowledge about IT system. This is the Next gen version of viewsys and can be used to display HD content over system and change at will . A plug and play module allows the signage to be operated without any hassle

### Benefits of product

Next Generation Technology

**Viewsys 4K** is based on state of art technology that allows Brands and Retail chains to use it and enhance value with ease of operation.

### Competitive Edge

Viewsys 4K has been designed that allows customer to be on top of your product positioning and give competitive edge by allowing product, information ,launch to be shared to customers at will.

### Plug and Play

Just connect the box and start using the product. Viewsys 4k is as easy to use as its other versions.

### Content over Fly

Broadcasting of content can be done over fly. Just upload – Verify – Push and content is over screen.

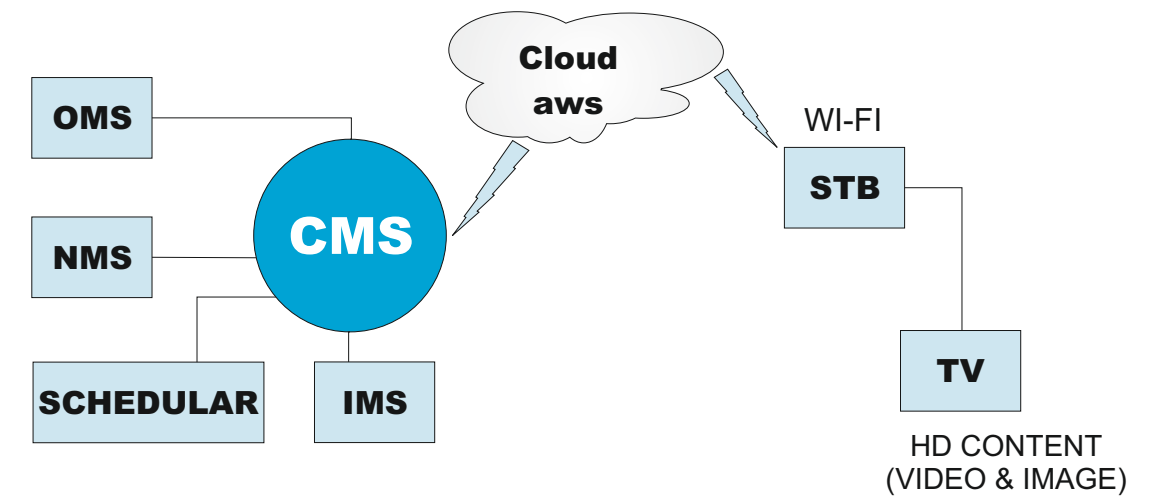

### Ease of Deployment

In just few min Viewsys 4K can be up and running. One needs to install screen and connect the Box with HDMI and Viewsys system will take control for configuration over fly.

### Play list Manageability

With Viewsys 4K , one can manage playlist and position them according to their business needs. An easy approach to meet Market demands.
